1	Overall the delivery of the content was disorganized, information would have been useful if it was delivered better that way I could grasp more from the subject and be able to apply it. Although it is understood that the student should try to understand the lesson further in their own time, it is up to the teacher to present the information in such a way that it should be retained and that sense can be made of the information. I did not feel this was so for this class. Most things were to be figured out on our own and the professor was just as confused as the students. This class was disappointing, to say the least.	6/15/2016 1:03 AM

4	The textbook can be difficult to use and use of the calculator should be encouraged due to the over all intensity of the course. I also do not see the relevance in submitting the final project in the form of a paper for this course due to the amount of calculation required. I understand that the class requires a final project to be submitted, however I do not feel it should be done in the format of a research paper.	6/14/2016 7:34 PM
